Many digital relays are designed with the capability for recording and displaying the close output signal from the relay was initiated (Bk1 CLS OUT On). Relay module, with soldered-in miniature switching relay, contact (AgPd60 5 m hard gold-plated): Medium to large loads, double A2 connection, 1 PDT, input. Relay module for high inrush currents, with soldered-in relay, contacts (AgCdO + capacitive W): medium to large loads, 1 N/O contact, input voltage 24 V DC. Observe that there are two neutral connected relays: relay R2 trips the upstream breaker BK3, while relay R3 trips the downstream breaker BK1. These two. Note 1: Some products may have a different model number structure. Note 2: In order to avoid the confusion of I (English letter) and 1 (number), I (English letter).
