

Gnostic Religion in Antiquity

THE GNOSTIC SOCIETY LIBRARY

Book Review – October 2016

The Gnostic New Age: How a Countercultural Spirituality Revolutionized Religion from Antiquity to Today
April D. DeConick (Columbia University Press, 2016)

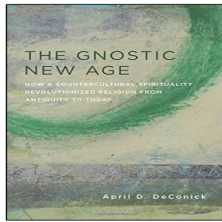

Reviewed by Lance S. Owens

At the beginning, let me give my bottom-line summary: April DeConick has written one of the most important and thought-provoking books on Gnosticism to be published in several years.

Gnosticism is a complex subject, and the understanding of Gnostic tradition has undergone radical shifts over the last century—changes powerfully impelled by the discovery in 1945 of an ancient library of Gnostic scriptures near Nag Hammadi, Egypt. After two decades of work on the translations, these manuscripts were published in 1977 as the *The Nag Hammadi Library*. The next year, in 1978, a young scholar named Elaine Pagels published a best-selling commentary on the texts, dubbing them *The Gnostic Gospels*. So began a new age in Gnostic studies.

Today, about forty years after those landmark publications, comprehension of the Gnostic gospels, and Gnostic tradition more generally, remains a work in progress. The first generations of scholars largely accomplished the primary task of translating the manuscripts from ancient Coptic and Greek. The principal challenge facing the current generation of students is unraveling the meaning, context, and modern relevance of Gnosticism. New generations of readers are bringing new visions to Gnostic studies; each is awakening perspectives uniquely significant to the present moment. The outmoded perception of Gnosis as a pernicious ancient heresy has been, thankfully, laid to final rest.

Agreement is emerging that Gnosticism should no longer be studied exclusively in the context of ancient Christian history or theology. Gnosis is a perennial tradition, and its rediscovery in this age presents a vibrant hermeneutic challenge to antique theologies. The Gnostic worldview resonates with modern consciousness and psychology; it unveils vital perspectives on human nature. Dr. April DeConick— Professor of Biblical Studies and chair of the Department
